# Mind Wars: Brain Science and the Military in the 21st Century

Jonathan D. Moreno

**Mind Wars: Brain Science and the Military in the 21st Century** Jonathan D. Moreno

“One of the most important thinkers describes the literally mind-boggling possibilities that modern brain science could present for national security.” —**LAWRENCE J. KORB**, former US Assistant Secretary of Defense

“Fascinating and frightening.” —*Bulletin of the Atomic Scientists*

The first book of its kind, *Mind Wars* covers the ethical dilemmas and bizarre history of cutting-edge technology and neuroscience developed for military applications. As the author discusses the innovative Defense Advanced Research Projects Agency (DARPA) and the role of the intelligence community and countless university science departments in preparing the military and intelligence services for the twenty-first century, he also charts the future of national security.

Fully updated and revised, this edition features new material on deep brain stimulation, neuro hormones, and enhanced interrogation. With in-depth discussions of “psyops” mind control experiments, drugs that erase both fear and the need to sleep, microchip brain implants and advanced prosthetics, supersoldiers and robot armies, *Mind Wars* may read like science fiction or the latest conspiracy thriller, but its subjects are very real and changing the course of modern warfare.

**Jonathan D. Moreno** has been a senior staff member for three presidential advisory commissions and has served on a number of Pentagon advisory committees. He is an ethics professor at the University of Pennsylvania and the editor-in-chief of the Center for American Progress’ online magazine *Science Progress*.
