## Image Analysis and Recognition: 7th International Conference, ICIAR 2010, Póvoa de Varzim, Portugal, June 21-23, 2010, Proceedings, Part II (Lecture Notes in Computer Science)

ICIAR 2010, the International Conference on Image Analysis and Recognition, held in Povo do Varzim, Portugal, June 21-23, was seventh in the ICIAR - ries of annual conferences alternating between Europe and North America. The idea of organizing these conferences was to foster the collaboration and exchange between researchers and scientists in the broad fields of image analysis and pattern recognition, addressing recent advances in theory, methodology and applications. During the years the conferences have become a forum with a strong participation from many countries. This year, ICIAR was organized along with AIS 2010, the International Conference on Autonomous and Intelligent Systems. Both conferences were organized by AIMI- Association for Image and Machine Intelligence. For ICIAR 2010, we received a total of 164 full papers from 37 countries. The review process was carried out by members of the Program Committee and other reviewers; all are experts in various image analysis and pattern recognition areas. Each paper was reviewed by at least two reviewers, and checked by the Conference Chairs. A total of 89 papers were finally accepted and appear in the two volumes of these proceedings. The high quality of the papers is attributed first to the authors, and second to the quality of the reviews provided by the experts. We would like to sincerely thank the authors for responding to our call, and to thank the reviewers for their careful evaluation and feedback provided to the authors. It is this collective effort that resulted in the strong conference program and high-quality proceedings.
