Theory of Dielectric Optical Waveguides (Optics and Photonics Series)

Dietrich Marcuse

Theory of Dielectric Optical Waveguides (Optics and Photonics Series) Dietrich Marcuse

This textbook presents the theory underlying these essential technologies - optical fiber communications, integrated optics, and optical sensors. Taking a step-by-step format, Marcuse teaches the theory of light transmission in optical fibers and in dielectric optical waveguides. The text includes methods for calculating modes and their interactions. This second edition contains new material on coupled mode theory, coupled power theory, approximate and numerical methods, nonlinear effects, and soliton propagation.

From reader reviews:

Katherine Sherrer:

Hey guys, do you want to find a new book to learn? Maybe the book with the concept Theory of Dielectric Optical Waveguides (Optics and Photonics Series) suitable to you? The book was written by a famous writer in this era. Typically the book titled Theory of Dielectric Optical Waveguides (Optics and Photonics Series) is the one of several books in which everyone reads now. This book has inspired many people in the world. When you read this book you will enter the new dimensions that you never knew prior to. The author explained their strategy in a simple way, thus all of us can easily understand the core of this reserve. This book will give you a wide range of information about this world now. In order to see the representation of the world on this book.

Natalie White:

Spent a free time to be a fun activity to perform! A lot of people spend their spare time with their family, or their friends. Usually they undertake activities like watching television, going to the beach, or a picnic in the park. They actually do the same thing every week. Do you feel it? Do you wish for something different to fill your personal free time/ holiday? Could reading a book be an option to fill your cost-free time/ holiday. The first thing you ask may be what kinds of reserves that you should read. If you want to try looking for a book, maybe the reserve titled Theory of Dielectric Optical Waveguides (Optics and Photonics Series) can be a great book to read. Maybe it might be the best activity for you.

Ramon Jeter:

People live in this new moment of lifestyle and always attempt to and must have the extra time or they will get a lot of stress from both lifestyle and work. So, if we ask do people have spare time, we will say absolutely indeed. People are human, not really a huge robot. Then we request again, what kind of activity do you have when the spare time comes to you actually of course your answer will probably be unlimited. Then do you ever try this one, reading books. It can be your alternative with spending your spare time, the book you have read will be Theory of Dielectric Optical Waveguides (Optics and Photonics Series).

Alexandra Dickey:

Are you kind of an occupied person, only have 10 or even 15 minutes in your moment to upgrade your mind expertise or thinking skills possibly analytical thinking? Then you are experiencing a problem with the book in comparison with can satisfy your small amount of time to read it because pretty much everything you only find a book that needs more time to go through. Theory of Dielectric Optical Waveguides (Optics and Photonics Series) can be your answer as it can be read by a person who has those short free time problems.
