Discover How Bodyweight Exercises Based On Animal Movement Can Help You Transform Your Body And Your Life

What is the ultimate form of bodyweight training? Is it Tai Bo? Cross fit? Perhaps some form of running? Some of these forms of exercises are good (and others not, *cough * running *cough*) but they are not the best. If you want to perform the best bodyweight exercises that will make you lean and mean in record time look no further than Mother Nature. Here's what I mean. Any animal you can think of possess a fitness level heads and shoulders above what man can do. Consider the following:

The Endurance Of A Tiger

All big cats possess unbelievable coordination, flexibility, speed and power. An adult tiger has the strength and endurance to roam over a domain that may cover a 100 square miles. How many men or women can do that? It's said that the tendons in the legs of a tiger are so strong that if it's shot in the head it will remain standing. Now THAT'S strength.

The Power Of A Gorilla

Gorillas are approximately the same height as a man. However, they are 300 to 500 pounds of pure muscle, and they do this on a mostly vegetarian diet! They are also 5 to 20 times stronger than the average man, yet they never lift weights. What do they know that we don't?

The Speed Of A Cheetah

Cheetah's are lean, powerful, and fast. They are capable of running at speeds in excess of 70 mph. Yet you never see them running on a treadmill, do you?

What Is Mother Nature's Secret? Bodyweight Training

The fact of the matter is that animals in nature don't perform cross fit, tai bo, or any of the other countless ways that man has come up with to stay in shape. The only thing they do is exercise throughout the day using nothing but their own bodyweight. This is what gives them their explosive strength, flexibility and stamina. This is what they do. Don't you think you should too?
