Before "Bones", before "CSI", before "Quincy, M.E." there was Dr. John Thorndyke. In *The Eye of Osiris*, John Bellingham, noted Egyptologist vanished not once but twice in the same day. Two years later Dr. John Thorndyke must unravel the tangled claims on his estate and solve the riddle of the missing man. Is the dismembered body whose various remains start appearing at sites across the landscape that of John Bellingham? If so, how did he die, who killed him, and as important to Dr. Thorndyke's clients, when was he killed? Using the latest techniques of Edwardian forensic science, Dr. John Thorndyke must answer these questions and bring the case of "The Eye of Osiris" to a successful conclusion.
