Biology of Marine Mammals

John E. Reynolds

Biology of Marine Mammals John E. Reynolds

Taking an integrated approach to the biology of marine carnivores, cetaceans, and sirenians, twenty-two prominent researchers compare marine mammals with one another and with terrestrial mammals, providing a framework for fundamental biological and ecological concepts. They describe functional morphology, sensory systems, energetics, reproduction, communication and cognition, behavior, distribution, population biology, and feeding ecology. They also detail the physiological adaptations—for such activities and processes as diving, thermo-regulation, osmoregulation, and orientation—that enable marine mammals to exploit their aquatic environment.

From reader reviews:

Lavone Anderson:

People live in this new moment of lifestyle always aim to and must have the extra time or they will get lots of stress from both everyday life and work. So , if we ask do people have spare time, we will say absolutely of course. People is human not really a huge robot. Then we ask again, what kind of activity do you possess when the spare time coming to anyone of course your answer will probably unlimited right. Then ever try this one, reading textbooks. It can be your alternative in spending your spare time, the book you have read is actually Biology of Marine Mammals.

Wendy Cort:

Reading a book to become new life style in this calendar year; every people loves to study a book. When you read a book you can get a lot of benefit. When you read publications, you can improve your knowledge, mainly because book has a lot of information onto it. The information that you will get depend on what forms of book that you have read. If you want to get information about your analysis, you can read education books, but if you want to entertain yourself you are able to a fiction books, this kind of us novel, comics, and soon. The Biology of Marine Mammals offer you a new experience in reading a book.

James Harris:

In this time globalization it is important to someone to find information. The information will make a professional understand the condition of the world. The healthiness of the world makes the information much easier to share. You can find a lot of references to get information example: internet, magazine, book, and soon. You will see that now, a lot of publisher which print many kinds of book. The particular book that recommended for your requirements is Biology of Marine Mammals this reserve consist a lot of the information of the condition of this world now. That book was represented just how can the world has grown up. The terminology styles that writer require to explain it is easy to understand. Often the writer made some research when he makes this book. That's why this book acceptable all of you.

Armida Shipman:

What is your hobby? Have you heard in which question when you got scholars? We believe that that concern was given by teacher for their students. Many kinds of hobby, Everybody has different hobby. So you know that little person including reading or as studying become their hobby. You have to know that reading is very important along with book as to be the issue. Book is important thing to provide you knowledge, except your personal teacher or lecturer. You see good news or update regarding something by book. Many kinds of books that can you choose to use be your object. One of them is actually Biology of Marine Mammals.
