On the Origin of Species by Charles Darwin | Summary & Study Guide BookRags

The Origin of Species is an extended argument for the belief that species that are now living were not created independently by God, but evolved from other, past species through the process of natural selection. The text of the book is divided into two purposes: first, explaining what natural selection is and how it could produce species; second, responding to the objections of those who do not agree with it.

This study guide includes the following sections: Plot Summary, Chapter Summaries & Analysis, Characters, Objects/Places, Themes, Style, Quotes, and Topics for Discussion.
