## **Statistical Methods for Forecasting** Bovas Abraham, Johannes Ledolter

The Wiley-Interscience Paperback Series consists of selected books that have been made more accessible to consumers in an effort to increase global appeal and general circulation. With these new unabridged softcover volumes, Wiley hopes to extend the lives of these works by making them available to future generations of statisticians, mathematicians, and scientists.

"This book, it must be said, lives up to the words on its advertising cover: 'Bridging the gap between introductory, descriptive approaches and highly advanced theoretical treatises, it provides a practical, intermediate level discussion of a variety of forecasting tools, and explains how they relate to one another, both in theory and practice.' It does just that!"

-Journal of the Royal Statistical Society

"A well-written work that deals with statistical methods and models that can be used to produce short-term forecasts, this book has wide-ranging applications. It could be used in the context of a study of regression, forecasting, and time series analysis by PhD students; or to support a concentration in quantitative methods for MBA students; or as a work in applied statistics for advanced undergraduates."

-Choice

Statistical Methods for Forecasting is a comprehensive, readable treatment of statistical methods and models used to produce short-term forecasts. The interconnections between the forecasting models and methods are thoroughly explained, and the gap between theory and practice is successfully bridged. Special topics are discussed, such as transfer function modeling; Kalman filtering; state space models; Bayesian forecasting; and methods for forecast evaluation, comparison, and control. The book provides time series, autocorrelation, and partial autocorrelation plots, as well as examples and exercises using real data. Statistical Methods for Forecasting serves as an outstanding textbook for advanced undergraduate and graduate courses in statistics, business, engineering, and the social sciences, as well as a working reference for professionals in business, industry, and government.

### **From reader reviews:**

#### **James Lapham:**

Do you among people who can't read pleasant if the sentence chained in the straightway, hold on guys this kind of aren't like that. This Statistical Methods for Forecasting book is readable by means of you who hate the perfect word style. You will find the information here are arrange for enjoyable looking at experience without leaving also decrease the knowledge that want to give to you. The writer involving Statistical Methods for Forecasting content conveys the thought easily to understand by a lot of people. The printed and e-book are not different in the written content but it just different by means of it. So , do you even now thinking Statistical Methods for Forecasting is not loveable to be your top checklist reading book?

#### **Edward Thompson:**

A lot of people always spent all their free time to vacation or maybe go to the outside with them family or their friend. Do you realize? Many a lot of people spent they free time just watching TV, or playing video games all day long. If you would like try to find a new activity this is look different you can read any book. It is really fun for you personally. If you enjoy the book that you simply read you can spent the whole day to reading a book. The book Statistical Methods for Forecasting it is rather good to read. There are a lot of people that recommended this book. They were enjoying reading this book. When you did not have enough space to bring this book you can buy often the e-book. You can m0ore easily to read this book out of your smart phone. The price is not too expensive but this book has high quality.

#### **Christopher Arredondo:**

You may get this Statistical Methods for Forecasting by look at the bookstore or Mall. Simply viewing or reviewing it can to be your solve trouble if you get difficulties for ones knowledge. Kinds of this book are various. Not only by simply written or printed but also can you enjoy this book through e-book. In the modern era such as now, you just looking by your local mobile phone and searching what their problem. Right now, choose your current ways to get more information about your guide. It is most important to arrange yourself to make your knowledge are still change. Let's try to choose appropriate ways for you.

#### **Michael Jones:**

Reserve is one of source of know-how. We can add our knowledge from it. Not only for students but also native or citizen will need book to know the revise information of year in order to year. As we know those textbooks have many advantages. Beside many of us add our knowledge, could also bring us to around the world. By the book Statistical Methods for Forecasting we can acquire more advantage. Don't someone to be creative people? For being creative person must prefer to read a book. Only choose the best book that acceptable with your aim. Don't end up being doubt to change your life with that book Statistical Methods for Forecasting. You can more desirable than now.
