Java Threads

Scott Oaks, Henry Wong

Java Threads Scott Oaks, Henry Wong

Threads are essential to Java programming, but learning to use them effectively is a nontrivial task. This new edition of the classic *Java Threads* shows you how to take full advantage of Java's threading facilities and brings you up-to-date with the watershed changes in Java 2 Standard Edition version 5.0 (J2SE 5.0). It provides a thorough, step-by-step approach to threads programming. Java's threading system is simple relative to other threading systems. In earlier versions of Java, this simplicity came with tradeoffs: some of the advanced features in other threading systems were not available in Java. J2SE 5.0 changes all that: it provides a large number of new thread-related classes that make the task of writing multithreaded programs that much easier. You'll learn where to use threads to increase efficiency, how to use them effectively, and how to avoid common mistakes. This book discusses problems like deadlock, race conditions, and starvation in detail, helping you to write code without hidden bugs. *Java Threads*, Third Edition, has been thoroughly expanded and revised. It incorporates the concurrency utilities from `java.util.concurrent` throughout. New chapters cover thread performance, using threads with Swing, threads and Collection classes, thread pools, and threads and I/O (traditional, new, and interrupted). Developers who cannot yet deploy J2SE 5.0 can use thread utilities provided in the Appendix to achieve similar functionality with earlier versions of Java. Topics include:

- Lock starvation and deadlock detection
- Atomic classes and minimal synchronization (J2SE 5.0)
- Interaction of Java threads with Swing, I/O, and Collection classes
- Programmatically controlled locks and condition variables (J2SE 5.0)
- Thread performance and security
- Thread pools (J2SE 5.0)
- Thread groups
- Platform-specific thread scheduling
- Task schedulers (J2SE 5.0)
- Parallelizing loops for multiprocessor machines

In short, this new edition of *Java Threads* covers everything you need to know about threads, from the simplest animation program to the most complex applications. If you plan to do any serious work in Java, you will find this book invaluable. Scott Oaks is a senior software engineer for the Java Performance Engineering group at Sun Microsystems and the author of four books in the O'Reilly Java series. Formerly a senior systems engineer at Sun Microsystems, Henry Wong is an independent consultant working on various Java related projects.

From reader reviews:

Teresa Propst:

Do you have favorite book? If you have, what is your favorite's book? Book is very important thing for us to learn everything in the world. Each book has different aim or maybe goal; it means that publication has different type. Some people feel enjoy to spend their the perfect time to read a book. They may be reading whatever they take because their hobby is usually reading a book. Think about the person who don't like reading through a book? Sometime, person feel need book if they found difficult problem or perhaps exercise. Well, probably you'll have this Java Threads.

Charlene Johnson:

In this particular era which is the greater person or who has ability in doing something more are more important than other. Do you want to become one among it? It is just simple strategy to have that. What you must do is just spending your time almost no but quite enough to enjoy a look at some books. One of many books in the top checklist in your reading list will be Java Threads. This book which is qualified as The Hungry Inclines can get you closer in turning out to be precious person. By looking way up and review this e-book you can get many advantages.

Mable Watkins:

Guide is one of source of expertise. We can add our expertise from it. Not only for students and also native or citizen will need book to know the revise information of year to be able to year. As we know those guides have many advantages. Beside most of us add our knowledge, can also bring us to around the world. Through the book Java Threads we can have more advantage. Don't someone to be creative people? Being creative person must like to read a book. Only choose the best book that ideal with your aim. Don't become doubt to change your life at this time book Java Threads. You can more desirable than now.

Jennifer Meeks:

Reading a publication make you to get more knowledge as a result. You can take knowledge and information originating from a book. Book is prepared or printed or outlined from each source which filled update of news. Within this modern era like right now, many ways to get information are available for a person. From media social such as newspaper, magazines, science publication, encyclopedia, reference book, story and comic. You can add your knowledge by that book. Are you hip to spend your spare time to open your book? Or just looking for the Java Threads when you essential it?
