# Statistics for Chemical and Process Engineers: A Modern Approach

Yuri A.W. Shardt

**Statistics for Chemical and Process Engineers: A Modern Approach** Yuri A.W. Shardt

**A coherent, concise and comprehensive course in the statistics needed for a modern career in chemical engineering; covers all of the concepts required for the American Fundamentals of Engineering examination.**

This book shows the reader how to develop and test models, design experiments and analyse data in ways easily applicable through readily available software tools like MS Excel® and MATLAB®. Generalized methods that can be applied irrespective of the tool at hand are a key feature of the text.

The reader is given a detailed framework for statistical procedures covering:

- data visualization;
- probability;
- linear and nonlinear regression;
- experimental design (including factorial and fractional factorial designs); and
- dynamic process identification.

Main concepts are illustrated with chemical- and process-engineering-relevant examples that can also serve as the bases for checking any subsequent real implementations. Questions are provided (with solutions available for instructors) to confirm the correct use of numerical techniques, and templates for use in MS Excel and MATLAB can also be downloaded from [extras.springer.com](http://extras.springer.com).

With its integrative approach to system identification, regression and statistical theory, *Statistics for Chemical and Process Engineers* provides an excellent means of revision and self-study for chemical and process engineers working in experimental analysis and design in petrochemicals, ceramics, oil and gas, automotive and similar industries and invaluable instruction to advanced undergraduate and graduate students looking to begin a career in the process industries.

### **From reader reviews:**

#### **Shiela Steen:**

What do you think about book? It is just for students because they are still students or this for all people in the world, what the best subject for that? Simply you can be answered for that problem above. Every person has various personality and hobby per other. Don't to be obligated someone or something that they don't wish do that. You must know how great in addition to important the book Statistics for Chemical and Process Engineers: A Modern Approach. All type of book is it possible to see on many options. You can look for the internet sources or other social media.

#### **Beulah Scherr:**

Book is to be different for every single grade. Book for children until finally adult are different content. To be sure that book is very important for all of us. The book Statistics for Chemical and Process Engineers: A Modern Approach had been making you to know about other expertise and of course you can take more information. It is extremely advantages for you. The reserve Statistics for Chemical and Process Engineers: A Modern Approach is not only giving you far more new information but also being your friend when you experience bored. You can spend your own spend time to read your publication. Try to make relationship with all the book Statistics for Chemical and Process Engineers: A Modern Approach. You never truly feel lose out for everything if you read some books.

#### **Tara Huber:**

Playing with family in the park, coming to see the sea world or hanging out with good friends is thing that usually you will have done when you have spare time, then why you don't try issue that really opposite from that. A single activity that make you not sense tired but still relaxing, trilling like on roller coaster you are ride on and with addition of knowledge. Even you love Statistics for Chemical and Process Engineers: A Modern Approach, you are able to enjoy both. It is fine combination right, you still wish to miss it? What kind of hang type is it? Oh can occur its mind hangout folks. What? Still don't have it, oh come on its known as reading friends.

#### **Debra Becnel:**

The book untitled Statistics for Chemical and Process Engineers: A Modern Approach contain a lot of information on the item. The writer explains the girl idea with easy method. The language is very simple to implement all the people, so do not really worry, you can easy to read that. The book was authored by famous author. The author provides you in the new age of literary works. You can easily read this book because you can keep reading your smart phone, or model, so you can read the book throughout anywhere and anytime. In a situation you wish to purchase the e-book, you can available their official web-site and order it. Have a nice examine.
