## **Mathematical Ciphers: From Caesar to RSA (Mathematical World)** Anne L. Young

A cipher is a scheme for creating coded messages for the secure exchange of information. Throughout history, many different coding schemes have been devised. One of the oldest and simplest mathematical systems was used by Julius Caesar. This is where Mathematical Ciphers begins. Building on that simple system, Young moves on to more complicated schemes, ultimately ending with the RSA cipher, which is used to provide security for the Internet. This book is structured differently from most mathematics texts. It does not begin with a mathematical topic, but rather with a cipher. The mathematics is developed as it is needed; the applications motivate the mathematics. As is typical in mathematics textbooks, most chapters end with exercises. Many of these problems are similar to solved examples and are designed to assist the reader in mastering the basic material. A few of the exercises are one-of-a-kind, intended to challenge the interested reader. Implementing encryption schemes is considerably easier with the use of the computer. For all the ciphers introduced in this book, JavaScript programs are available from the Web. In addition to developing various encryption schemes, this book also introduces the reader to number theory. Here, the study of integers and their properties is placed in the exciting and modern context of cryptology. Mathematical Ciphers can be used as a textbook for an introductory course in mathematics for all majors. The only prerequisite is high school mathematics.

### **From reader reviews:**

#### **Margaret Clayton:**

Book is actually written, printed, or descriptive for everything. You can learn everything you want by a guide. Book has a different type. As we know that book is important issue to bring us around the world. Alongside that you can your reading talent was fluently. A guide Mathematical Ciphers: From Caesar to RSA (Mathematical World) will make you to possibly be smarter. You can feel a lot more confidence if you can know about every little thing. But some of you think that will open or reading a new book make you bored. It is not make you fun. Why they may be thought like that? Have you trying to find best book or suited book with you?

#### **Janet Magnuson:**

What do you in relation to book? It is not important along? Or just adding material when you really need something to explain what you problem? How about your time? Or are you busy man or woman? If you don't have spare time to accomplish others business, it is gives you the sense of being bored faster. And you have free time? What did you do? Everybody has many questions above. They should answer that question because just their can do in which. It said that about publication. Book is familiar in each person. Yes, it is correct. Because start from on jardín de infancia until university need that Mathematical Ciphers: From Caesar to RSA (Mathematical World) to read.

#### **Kathi Adamo:**

This Mathematical Ciphers: From Caesar to RSA (Mathematical World) book is absolutely not ordinary book, you have after that it the world is in your hands. The benefit you will get by reading this book is information inside this guide incredible fresh, you will get information which is getting deeper anyone read a lot of information you will get. This kind of Mathematical Ciphers: From Caesar to RSA (Mathematical World) without we comprehend teach the one who examining it become critical in pondering and analyzing. Don't be worry Mathematical Ciphers: From Caesar to RSA (Mathematical World) can bring whenever you are and not make your tote space or bookshelves' come to be full because you can have it in your lovely laptop even phone. This Mathematical Ciphers: From Caesar to RSA (Mathematical World) having very good arrangement in word along with layout, so you will not truly feel uninterested in reading.

#### **Adam Carter:**

Is it anyone who having spare time and then spend it whole day by watching television programs or just lying down on the bed? Do you need something totally new? This Mathematical Ciphers: From Caesar to RSA (Mathematical World) can be the respond to, oh how comes? A book you know. You are therefore out of date, spending your spare time by reading in this brand new era is common not a geek activity. So what these ebooks have than the others?
