Political philosophy, or political theory, is the study of topics such as politics, liberty, justice, property, rights, law, and the enforcement of a legal code by authority: what they are, why (or even if) they are needed, what, if anything, makes a government legitimate, what rights and freedoms it should protect and why, what form it should take and why, what the law is, and what duties citizens owe to a legitimate government, if any, and when it may be legitimately overthrown, if ever. In a vernacular sense, the term "political philosophy" often refers to a general view, or specific ethic, political belief or attitude, about politics, synonymous to the term "political ideology". Political philosophy is considered by some to be a sub-discipline of political science; however, the name generally attributed to this form of political enquiry is political theory, a discipline which has a closer methodology to the theoretical fields in the social sciences - like economic theory - than to philosophical argumentation - like that of moral philosophy or aesthetics.
